Portfolio: ottles91.github.io (Project Showcase)

Professional Summary: Software Engineer with 2+ years of experience in C#, Python, and C++, focused on building reliable, testable systems and improving performance through thoughtful architecture and automation. Proven ability to reduce technical debt, improve stability, and deliver maintainable backend solutions in Agile environments.

Software Development Experience

Software Engineer

3Pupper Studios, Remote

November 2023 - Present

- Refactored C# systems and application architecture for a VR app, reducing technical debt and improving modularity and testability
- Designed and implemented an automated testing workflow, improving runtime stability and enabling faster, more confident iteration
- Reduced application startup time by ~20% through profiling and targeted performance optimizations

Mobile Software Engineer

Zaapp, Salt Lake City, Utah

May 2017 - November 2017

- Contributed Swift and C# code on a small Agile team building mobile applications, including implementing testing workflows that improved reliability
- Acted as a technical liaison with stakeholders to align feature expectations with technical constraints and reduce scope creep
- Worked directly with company founders to transition client contracts from prior ventures, helping establish trust and continuity with early customers

Unity & Mobile Software Engineer

Pixio LLC, Salt Lake City, Utah

January 2013 - October 2013

- Served as co-lead engineer on a tabletop gaming application that projected interactive Dungeons & Dragons maps onto physical tables
 - Developed iOS applications in Objective-C, focusing on scalable, maintainable code aligned with client business requirements
 - Worked directly with clients in an Agile environment to gather requirements and translate creative concepts into functional designs while balancing scope, timelines, and technical constraints
-

Skills

Programming Languages

C#, Python, SQL, Swift,
C/C++, Web Development
(HTML/CSS/JavaScript), Java

Tools & Frameworks

Git, Docker, Jira, GitHub, .NET
(C#), Entity Framework, AWS

Development Practices

Agile/Scrum, RESTful API
Development, Test-Driven
Development (TDD), CI/CD,
SOLID Principles

Additional Experience

Employee Trainer & Sales Associate

The Home Depot, Salt Lake City, Utah

March 2015 - August 2019

- Trained and mentored 25+ new hires on department operations, specialized equipment, and store procedures, enabling faster onboarding and consistent performance
- Proactively identified operational gaps and coordinated task execution during manager absences, ensuring full department coverage and uninterrupted daily operations
- Became a trusted go-to associate by developing proficiency across a wide range of essential systems and equipment (e.g., lift truck operation, lock rekeying, automated sprinklers), consistently delivering on high-priority tasks with minimal oversight

Education

Bachelor of Science in Software Engineering • 3.6 GPA

Utah Valley University, Orem, Utah

Graduated May 2025

- Dean’s List: Fall 2023 • Fall 2024 • Spring 2025
 - Collaborated with faculty to modernize core Computer Science curriculum
 - Worked with faculty to develop a mobile app to help faculty form student teams based on skillset
 - President, iPhone Development Club: Led Swift development workshops and mentored members in building iOS app prototypes
-
