Professional Summary: Salt Lake City-based Software Engineer with a passion for writing clean, efficient code, mentoring peers, and delivering user-focused features that enhance performance and scalability

Education

Bachelor of Science in Software Engineering • 3.6 GPA

Utah Valley University, Orem, Utah

Graduation: May 2025

- Dean's List: Fall 2023 • Fall 2024 • Spring 2025
 - Collaborated with faculty to modernize core Computer Science curriculum
 - Worked with faculty to develop a mobile app to help faculty form student teams based on skillset
 - President, iPhone Development Club: Led Swift development workshops and mentored members in building iOS app prototypes
-

Skills

Programming Languages

C#, Python, Swift, C/C++,
SQL, JavaScript, HTML/CSS,
Java, Rust

Tools & Frameworks

Version Control (Git), Docker,
Jira, Entity Framework, C#
.NET, ASP.NET, AWS, GitHub,
Microsoft Office

Development Practices

Agile/SCRUM, RESTful API
Development, Software
Testing, CI/CD,
Software Design Patterns

Software Development Experience

Software Engineer

November 2023 - Present

3Pupper Studios, Remote

- Refactored C# systems and application architecture for a VR app, reducing technical debt and improving modularity and testability
- Designed and implemented an automated testing workflow, improving runtime stability and enabling faster, more confident iteration
- Reduced application startup time by ~20% through profiling and targeted performance optimizations

Mobile Software Engineer

May 2017 - November 2017

Zaapp, Salt Lake City, Utah

- Contributed Swift and C# code on a small Agile team building mobile applications, including implementing testing workflows that improved reliability
- Acted as a technical liaison with stakeholders to align feature expectations with technical constraints and reduce scope creep
- Worked directly with company founders to transition client contracts from prior ventures, helping establish trust and continuity with early customers

Unity & Mobile Software Engineer

January 2013 - October 2013

Pixio LLC, Salt Lake City, Utah

- Served as co-lead engineer on a tabletop gaming application that projected interactive Dungeons & Dragons maps onto physical tables
- Developed iOS applications in Objective-C, focusing on scalable, maintainable code aligned with client business requirements
- Worked directly with clients in an Agile environment to gather requirements and translate creative concepts into functional designs while balancing scope, timelines, and technical constraints

Additional Experience**Employee Trainer & Sales Associate**

March 2015 - August 2019

The Home Depot, Salt Lake City, Utah

- Trained and mentored 25+ new hires on department operations, specialized equipment, and store procedures, enabling faster onboarding and consistent performance
 - Proactively identified operational gaps and coordinated task execution during manager absences, ensuring full department coverage and uninterrupted daily operations
 - Became a trusted go-to associate by developing proficiency across a wide range of essential systems and equipment (e.g., lift truck operation, lock rekeying, automated sprinklers), consistently delivering on high-priority tasks with minimal oversight
-
